

Paragon makes symbolic change.

Several years ago, Paragon Aquatics, the major force in the commercial pool industry for almost half a century, joined the Pentair Water family. Pentair's Water group is a values-driven, global leader in the movement, treatment, storage and enjoyment of water.

Our new combined logo represents that coming together of the two forces and signifies the strength and integrity it denotes in the pool and spa equipment industry.

The bond between Pentair and Paragon created new opportunities for Paragon to innovate more new products and systems, while remaining steadfast to its uncompromising design, production and customer-satisfaction principles.

Paragon has remained the leader for 48 years because we don't tread water.

Joining Pentair is a perfect example.

It means the best keeps on getting better.
